In our state-of-the-art logistics center, we rely on the latest technologies for an efficient and future-proof logistics process. Our cartons with lids do not require adhesive tape and plastic strapping to provide contemporary solutions. In addition, we customize the carton size to fit the contents to reduce the volume. In the following instructions, we show you how to open the cartons and reuse them for your customers.

**Our recommendation for resellers:**
Open the cartons from the bottom to reuse the box as intact as possible so that your customers receive a clean carton that they can open from the top. This will not only make the carton reusable, but also ensure that it reaches your customers in perfect condition.

1. **WAY THE OPENING FROM THE BOTTOM OF THE PACKAGE**
   YOUR CUSTOMER WILL NOT BE AWARE THAT THIS PACKAGE HAS ALREADY BEEN OPENED

1. Turn the box over so that you have the back side facing you.
2. Carefully loosen the adhesive strips securing the cardboard tabs by sliding your hand into the slot.
3. Now you can take out the ordered items and refine them by means of printing or embroidery.
4. Now you can put the finished goods and any package inserts, for example flyers or washing instructions, back into the box.
5. The previously opened adhesive strips will no longer be visible after sealing with adhesive tape.
6. Close the box again at the bottom with an adhesive tape of your choice. This way you can deliver the goods to your customer in an intact box.

In the following instructions, we show you how to open the cartons and reuse them for your customers.

Our advice for resellers:
To quickly access the delivery note, open the box from the top. Please note that once the carton has been opened from the top, it needs to be resealed independently, and the customer will be able to see that the box has been previously opened.

2. WAY THE OPENING FROM THE TOP OF THE PACKAGE
BY OPENING THE BOX FROM THE TOP, YOU WILL HAVE IMMEDIATE ACCESS TO THE DELIVERY NOTE

1. Detach the provided tear strip of the carton.
2. Carefully cut the tear edges clean using a sharp knife.
3. Fully open the box by flipping it open from the top.
4. Now you can take out the delivery note, giving you immediate access to it, and check if everything has been delivered correctly.
5. Now you can put the finished goods and additional materials, such as a care instruction or customized flyers, back into the box.
6. Close the box again with an adhesive tape of your choice.
